**Listing of Claims:**

1. – 46. (cancelled)

47. (original) A reporter of binding of a ligand to a determinant of a pharmacological target, which target requires binding of ligand to at least two determinants of said target to produce a biological response, said reporter comprising an rVab portion of an active rVab-Pep, and wherein said rVab component of said rVab-Pep binds to a first determinant of said target, and the peptide component binds to a second determinant of said target.

48. (original) The reporter of claim 47 wherein the rVab comprises VH and CL regions and the peptide is expressed bound to either or both of the amino terminus of the VH and the carboxy terminus of the CL.

49. (original) The reporter according claim 48 wherein the peptide component is attached to the amino terminus of the VH region.

50. (original) The reporter according to claim 47 wherein the peptide component is attached to the carboxy terminus of the CL region.

51. – 75. (cancelled)
